# Business Performance Report

**Business Performance Report**

**Project: Superstore Sales & Performance Analysis**

**Prepared by:** Varun Arun Joshi

**Intern ID-** MT2603

**Domain**: Data Analytics & Business Intelligence (Excel + SQL + Power BI / Tableau)

---

## 1⃣ Executive Summary

This report analyzes the overall sales performance, profitability, customer contribution, and return impact of the Superstore dataset. The objective of this analysis is to evaluate revenue distribution, profit efficiency, seasonal patterns, and operational risk due to product returns.

The analysis was conducted using PostgreSQL for data validation and KPI computation, and Power BI for visualization and executive reporting.

---

## 2⃣ Overall Financial Performance

◈ **Total Sales: ₹14.92 Million**

◈ **Total Profit: ₹1.52 Million**

◈ **Profit Margin: 10.2%**

◈ **Average Order Value (AOV): ₹2,710**

The business generated ₹14.92M in revenue with a profit margin of 10.2%, indicating moderate profitability. The AOV of ₹2,710 suggests consistent customer spending behavior across transactions.

---

## 3⃣ Regional Performance Analysis

The Central region generated the highest revenue, followed by West and East. South region contributed the lowest among the four.

This indicates stronger market penetration and sales performance in the Central region, suggesting potential opportunity to improve performance in lower-performing regions.

---

## 4⃣ Product Category Profitability

Technology category is the most profitable segment, contributing the highest share of total profit. Office Supplies shows moderate profitability, while Furniture generates the lowest profit.

This indicates that Technology products provide better margins and should be prioritized in strategic sales planning.

---

# Business Performance Report

### 5️⃣ Seasonal Sales Trend

Monthly sales trend analysis indicates fluctuations throughout the year, with higher sales observed during certain peak months. This suggests seasonal demand variation and the importance of inventory and marketing alignment during high-demand periods.

---

### 6️⃣ Returns & Operational Risk Analysis

🔹 **Return Rate: 10.4%**

🔹 **Returned Revenue: ₹1.65 Million**

🔹 **Total Returned Orders: 572**

Approximately 10.4% of orders were returned, resulting in ₹1.65M in revenue impact. This highlights operational inefficiencies or product-related concerns that may require further investigation.

Returns represent a significant revenue risk and directly affect overall profitability.

---

### 7️⃣ Customer Concentration Analysis

The top 10 customers contribute a significant share of total revenue. This indicates partial revenue concentration among high-value customers.

Maintaining strong relationships with these customers is critical for sustaining revenue stability.

---

### 8️⃣ Customer Segment Contribution

The Consumer segment contributes the largest share of total sales, followed by Corporate and Home Office segments.

This suggests that retail customers form the core revenue base of the business.

---

### 9️⃣ Key Business Insights

1. The business is revenue-strong but operates at a moderate profit margin (10.2%).
2. Technology category is the primary profit driver.
3. Central region leads sales performance.
4. Return rate (10.4%) is a significant operational concern.
5. Customer revenue concentration requires retention strategy focus.

---

### 🔟 Strategic Recommendations

1. Reduce return rate through quality control and logistics optimization.

2. Expand high-margin Technology product portfolio.
3. Strengthen marketing in lower-performing regions (South & East).
4. Implement loyalty programs for top customers.
5. Optimize pricing strategy to improve profit margin.

---

**Conclusion**

The Superstore demonstrates strong revenue generation capability with consistent customer purchasing behavior. However, profitability can be enhanced by reducing return rates and improving category-level margin strategies. Strategic regional focus and customer retention initiatives can further strengthen long-term performance.
